

Bautista Priano Sobenko

Ciudad de Buenos Aires, Argentina · bautipriano@gmail.com · linkedin.com/in/bautistasobenko · bautistasobenko.dev

Full Stack Engineer building AI-integrated web platforms on Laravel and AWS. Led 3+ projects end-to-end as the primary engineer, from architecture design to production deployment. Equally comfortable gathering requirements, designing database schemas, writing Python automation scripts, or architecting serverless infrastructure.

WORK EXPERIENCE

Invisible Geeks

Project Lead and Full Stack Engineer

Madrid, Spain

Feb 2025 – Present

- Built automated publishing system processing 5,000+ public domain ebooks using OpenAI/Claude for content extraction and formatting. Full-stack solution with Python, AWS, Laravel, and MySQL.
- Developed image-seeding pipeline processing 20,000+ images via Google Search, Unsplash, and OpenAI APIs. Reduced content population time by 90% while ensuring license compliance.
- Led development of a markdown-based ATS that automated candidate assessment for 10+ job positions, reducing screening time by 75% while processing 3,000+ applicants monthly and improving candidate-job fit accuracy.
- Designed and deployed AWS infrastructure using EC2, S3, RDS, and Lambda for serverless processing. Designed for scalability and cost-effectiveness supporting high-volume operations.
- Delivered in an Agile/Scrum environment using Jira. Created and managed 300+ tasks across multiple sprints, ensuring sprint goal alignment and team coordination.

Atlantis Innovation Center

Founding Software Engineer

Mar del Plata, Argentina

Sep 2023 – Dec 2025

- Built and launched a comprehensive management platform from the ground up using PHP, Laravel, and Livewire for an Innovation Center, supporting 15 staff members and 300+ entrepreneurs annually by managing 100+ project submissions and 400 event registrations per year.
- Managed complete project lifecycle, from stakeholder requirement analysis to final deployment, including the architectural design of a complex relational database with over 40+ interconnected tables.

EDUCATION

National University of Mar del Plata

Bachelor's Degree in Computer Engineering

Mar del Plata, Argentina

Sep 2018 - Dec 2024

- Academic average: 7.8/10.0
- [View full academic record](#)

SKILLS & TECHNOLOGIES

- AI & LLM Development: Cursor, Claude Code, OpenAI API, Anthropic API, prompt engineering, Agentic AI, RAG.
- Languages and Frameworks: Laravel, PHP, Python, Java, C, Livewire, Filament, Vue.js, React, JavaScript, Node.js, Express.js, Alpine.js, Tailwind
- Tools & Platforms: Git, Github, Docker, AWS (EC2, S3, Lambda, RDS, Textract), Cloudflare, MySQL
- Soft skills: Teamwork, Critical Thinking, Effective Communication, Leadership, Attention to Detail
- Languages: Spanish (Native), English B2+ (Upper Intermediate)
